

Two new products, manufactured by WALCO on behalf of CALpHOMIN and RUMINERALS

CALpHOMIN

CALpHOMIN is a broad acre soil additive, designed to bring your soil back to life both on top and around root systems. CALpHOMIN acts to bring your soil pH back to good productive levels and encourages the growth of soil enzymes, earthworms and microbes which all contribute to the breakdown of the nutrients and dead plant matter in the soil in a manner so as to provide humus and a balanced nutrient portfolio for plants to grow and increases the plants ability to fight off pests, fungal diseases and frost.

INCREASE YOUR SOILS' VITALITY WITH...

RUMINERALS is a Ruminant Animal stock feed supplement (Not for Horses) designed to be mixed with feed or used simply as a stand-alone, placed close to feed or water for animals to access when they feel the need for it.

Our aim is to help combat hypocalcaemia/milk tetany/yarding disease/acidosis and to assist with the best possible utilisation of available feed.
